

Tree.st

Educational Institutions:

Improve student quality of life and promote inter-departmental collaborations

Tree.st is a private community search tool for educational institutions that enables your students and faculty to discover and connect with each other based criteria specific to your school.

With Tree.st, our incoming class can now connect with each other prior to arriving on campus and find potential roommates, mentors, and activity partners!

Feature	Solution	Benefit
Detailed Student Profiles	Students can create social profiles with school-specific criteria such as interests, research experience, major, skills, extracurricular activities, and more	Students can share specific information about themselves with classmates in order to make friends, find roommates and activity partners, and share new research and career opportunities with each other
Extensive Student Search Engine	Students can search for one another within a university based on any combination of school-specific criteria	Students can identify classmates with specific interests, skills, or backgrounds in order to seek help, inform others of opportunities, or ask questions and receive answers. This can substantially enhance the student body's sociability
Student Body Analytics	University leaders can analyze student body demographics based on student profiles	University officials can better understand their students and create opportunities and events tailored to their students' unique backgrounds, thereby better allocating resources and increasing student community engagement
"Smart" Groups	Automatically group students by specific criteria and empower them to work together to solve problems and change the world.	Students can contact specific classmates based on specific criteria, thereby allowing universities to facilitate meaningful connections between students
