## Businesses:

Enhance productivity and break business silos  
to drive innovation

**Tree.st** is a private community search tool for companies that enables employees to discover and connect with each other based on criteria specific to your organization.

My employees  
can now find each other  
across the entire company  
and leverage their expertise  
to boost our sales!

**Michelle**  
Director at a small manufacturing company

Feature	Solution	Benefit
<b>Detailed Employee Profiles</b>	Employees can create directory profiles with company-specific criteria such as interests, role, experience, department, skills, and professional affiliations	Companies can provide their employees with rich information about each other on the web, thus increasing connections between members
<b>Extensive Employee Search Engine</b>	Employees can search for one another within a company based on any combination of company-specific criteria	This can enhance knowledge sharing within a company and lead to higher productivity
<b>Employee Analytics</b>	Company management can analyze employee demographics based on employee profiles	This can help companies better allocate financial resources. Management can better understand their employees and create new career opportunities, events, and trainings tailored to their employees skills and needs.
<b>"Smart" Groups</b>	Automatically group employees of a company by specific criteria such as skills, roles, expertise, and interests	Employees can contact specific colleagues within their company based on specific skills, interests, or expertise. This allows employees to share opportunities and resources with colleagues
